

Audio Stego Writeup

WRITE THIS UP PROPERLY AT SOME POINT

Get given a random file with a changed file signature to look like a font file binary... there's very little two value file sigs so hopefully they'll realise they need to convert it to one of them.. eventually they'll find a format that works and realise quickly its hidden in the spectrogram but also reversed.. just to add another step.

```
SECURI-TAY{St3g0_Is_C00l}
```
